

# Software Requirements Specification (SRS)

Project Name: Lookit – Education Directory Platform

## 1. Overview

### 1.1 Purpose

Lookit is a web-based directory platform designed to connect users with education-related professionals and services, with a strong focus on special education needs (e.g., speech therapy, ADHD, dyslexia, etc.).

### 1.2 Objective

- Provide a searchable directory of education professionals
- Enable positive review-based validation
- Support nationwide scalability (U.S.)
- Monetize via advertising and affiliate recommendations

## 2. Scope

### Core Features (Phase 1 - MVP)

- Professional directory listing
- Search by category + ZIP code
- Profile pages for professionals
- Positive-only rating & feedback system
- Admin panel for management

### Future Scope (Phase 2+)

- Mobile application (iOS + Android)
- Paid advertising placements
- Affiliate marketplace integration
- Multi-region scaling across the U.S.

## 3. User Roles

Visitor/User – Search, view listings, give reviews

Professional – Create/manage profile

Admin – Manage users, listings, reviews, categories

## 4. Functional Requirements

### 4.1 User Module

- User registration/login (Email, Google optional)
- Search professionals by category and ZIP/location
- View professional profiles
- Submit ratings (positive only) and feedback

#### 4.2 Professional Module

- Profile creation (name, specialization, location, contact, services)
- Upload certifications (optional)
- Manage profile

#### 4.3 Search & Discovery

- Filters: category, location radius
- Sorting: rating, popularity
- Pagination / lazy loading

#### 4.4 Review System

- Only positive reviews allowed
- Star ratings (restricted to positive range)
- Admin moderation (optional)

#### 4.5 Admin Panel

- Manage users, professionals, categories, reviews
- Approve/reject listings
- Basic analytics dashboard

#### 4.6 Advertising Module (Future Phase)

- Banner placements
- Sponsored listings
- Featured professionals

#### 4.7 Affiliate / Product Recommendations

- Books, educational tools, supplies
- External redirection to third-party platforms

### 5. Non-Functional Requirements

#### 5.1 Performance

- Load time < 3 seconds
- Optimized search queries

## 5.2 Scalability

- Multi-state expansion support
- High concurrent users

## 5.3 Security

- HTTPS encryption
- Secure authentication (JWT/OAuth)

## 5.4 Usability

- Mobile-first responsive design
- Simple UX for parents and educators

## 6. Technology Stack

Frontend: Next.js

Backend: Node.js

Database: PostgreSQL

Hosting: AWS / Azure

Search: ElasticSearch (optional)

## 7. Integrations

- Google Maps API
- Affiliate platforms
- Email notifications

## 8. Timeline

To be defined
